

2015 SUSTAINABILITY SNAPSHOT

Year-End 2015

Prologis is the global leader in industrial real estate and the world's foremost provider of sustainable logistics facilities. Our position is guided by our longstanding commitment to minimize the environmental impacts of our business and development activities to deliver long-term value to our customers, investors, employees and communities.

We set goals, establish strategies, track progress and report outcomes across our global portfolio for the three dimensions of sustainability: **Environmental, Social and Governance**. Below is a summary of our sustainability accomplishments as of year-end 2015:

Environmental Stewardship

Sustainable Building Certifications

- 68 million SF (6.3 million m²) across 173 projects in 15 countries
- In 2015, we added 45 projects (15 million SF)

Energy-Efficient Operations

- Approximately 73% of our operating portfolio has energy efficient lighting, (based on 96% of the portfolio surveyed)

Solar Energy

- Total solar footprint of 149 MW of generating capacity in nine countries equating to clean power for 22,000 average homes each year in the respective countries
- Increased solar portfolio by over 30 MW in 2015 (11.6 MW of new Prologis solar projects plus 18.6 MW via property acquisitions)

Cool Roofs

- Approximately 31% of our operating portfolio (192 million SF) has reflective roofing, which reduces roof surface temperatures by as much as 50°F

Environmental Benefits

We estimate our global portfolio to be 22% more lighting-efficient per operating hour than prevailing US codes would dictate and this should translate into real savings for our customers. For every hour our global facility network is in operation, the relative savings would equate to switching off over 1.3 million 60W bulbs.
